**SUPPLEMENTARY INFORMATION:** Reclamation is issuing this notice

42 U.S.C. 4321 et seq.; the Council on Environmental Quality's regulations for  
implementing NEPA, 40 CFR parts 1500 through 1508; Department of the  
Interior's NEPA regulations, 43 CFR part 46; and Bureau of Land Management  
regulations at 43 CFR 1610.2.

**Background.**

Reclamation will prepare an EIS for the LPP Project as proposed by the Utah  
Board of Water Resources (UBWR). The LPP is a proposed 140-mile, 69-inch-  
diameter water delivery pipeline that begins at Lake Powell near Glen Canyon Dam in  
Page, Arizona, and ends at Sand Hollow Reservoir near St. George, Utah. The pipeline

would deliver up to 86,249 acre-feet of water from Lake Powell to Sand Hollow Reservoir. UBWR proposes building the LPP in order to bring a second source of water to Washington and Kane Counties in Utah to meet future water demands, diversify the regional water supply portfolio, and enhance the water supply reliability.

UBWR previously proposed a pipeline project with an intake at Lake Powell that included a hydroelectric peaking station at Hurricane Cliffs, Utah. The Federal Energy Regulatory Commission (FERC) was the lead Federal agency for that project because it would have required a hydroelectric license issued by the FERC. The UBWR withdrew its application to the FERC on September 25, 2019, and the project was terminated effective October 10, 2019.

Reclamation has been designated the lead Federal agency by the Department for the LPP NEPA process. The Bureau of Land Management (BLM), U.S. Fish and Wildlife Service (FWS), Bureau of Indian Affairs (BIA) and National Park Service (NPS) are cooperating agencies. Based on the changes to project design and the lead federal agency, Reclamation is initiating a new public scoping process, which will require interested parties to submit new comments on the current proposal. Reclamation is also reinitiating government to government consultation with Indian tribes under section 106 of the National Historic Preservation Act and in accordance with Executive Order 13175.

Two pipeline alignments have been proposed: the Southern Alternative and the Highway Alternative. Both alternatives begin and end in the same locations. The Southern Alternative would travel south of the Kaibab Indian Reservation while the

alignment for the Highway Alternative would cross lands held in trust by the United States for the benefit of the Kaibab Band of Paiute Indians, following Arizona State Route 389. The Southern Alternative would cross land administered by the BLM in Utah and Arizona and would require multiple right-of-way (ROW) grants and an amendment to the Arizona Strip Resource Management Plan (RMP), because a small portion of the pipeline would go outside an approved utility corridor.

The Highway Alternative would cross BLM and Tribal trust lands, which would require the BLM and BIA to issue ROW grants and require a tribal resolution from the Kaibab Band of Paiute Indians. Both alternatives would cross lands administered by Reclamation and the NPS, requiring Reclamation to issue a license agreement and the NPS to issue a ROW permit under either alternative.

In addition, UBWR has requested a water exchange contract with Reclamation. Under the exchange contract, UBWR would forbear the diversion of a portion of the natural flows to which UBWR is entitled and allow these flows to contribute to meeting the Endangered Species Act Upper Colorado River Recovery Implementation Program requirements in the Green River. In exchange, UBWR would deplete an equal amount of water released from Flaming Gorge Dam throughout the year and available at Lake Powell. This exchange contract would not entitle UBWR to call for releases from Flaming Gorge.
