Re: Water Horse Resources, LLC

Application Number: 41-3747 A81080

Pipeliners Local Union 798 supports this water filing and the subsequent development of this project. Local 798 represents nearly 8,000 pipeline construction workers in the United States. This project meets the infrastructure development goals of the current administration and will provide substantial economic and jobs benefits related to renewable energy development, storage, and linear transmission opportunities. New jobs, long-term operational employment, and substantial additional linear construction is supported by Pipeliners 798.

Similar to the Utah Lake Powell Project, we support this application for water supply and support Water Horse Resources, LLC in the development of this project. The project is supported by our organization with substantial workforce interests in the states of Utah, Wyoming, and Colorado.

Based on current information, the project is sound, both economically and environmentally, with an opportunity to develop new water supplies for use in the Upper Basin. We feel this project, like the LPP, is good for Utah and Utah workers.
