

Hi Terry and Carly,

I wanted to let you know that it simply not possible for us to get completely coordinated across all of the TNC state chapters in time to sign onto the comments on the Interim Report #1 submitted by the other conservation groups. But we wanted you to know that we not disagreeing with those comments by not signing onto them. Instead, we will remain focused on working with Reclamation to address many of the issues posed by those comments and especially to develop more robust metrics for healthy river flows across the storylines.

Thanks and let me know if you have any questions about this.

Taylor
