Subject: Water Right 92-674 (A79183)

I request a hearing in Moab, Utah per Rule 655-6-2 for water right 92-674(A79183). This request has the possibility of reducing spring flows in both the Book Cliffs and in Arches National Park.

The Book Cliffs are in the Southeastern District for deer and elk hunting. I have hunted in this district for over 15 years and the quality and quantity of game directly affects one of my food sources.

Visitation to Arches National Park supplies the majority of jobs in Grand County and any reduction in visitation due to a reduction in available water will directly affect the values of my property in Grand County.

Sincerely:

William E Love
